## ABOUT ME

Frontend Developer focused on React and Next.js. I build fullstack applications through real freelance projects, with emphasis on modular interfaces and responsive experiences. Looking for my first team role to contribute and grow through concrete challenges.

## TECHNICAL SKILLS

| CATEGORY | TECHNOLOGIES |
|---|---|
| Core | HTML5 · CSS3 · Flexbox · Grid · Responsive Design · JavaScript ES6+ |
| Frameworks | React.js · Next.js |
| Styling | Tailwind CSS · Bootstrap |
| Backend / DB | Node.js · Express · MongoDB · Mongoose |
| Auth / APIs | JWT · Nodemailer · REST APIs |
| Tools | Git · GitHub · Figma · Postman · TablePlus |

## FREELANCE PROJECTS

### IEP — Corporate E-learning Platform 2023 – 2025

Stack: React · Next.js · Tailwind · Node.js · Express · MongoDB · JWT

- Multi-role corporate system with separate dashboards for Admin, HR, and Students.
- JWT authentication and email-based user verification using Nodemailer.
- Real-time exam module with automatic certificate generation upon completion.

**✓ Live in production · Repo on GitHub**

### E-commerce — Optical Contact Lens Store 2025

Stack: React · Node.js · Express · MongoDB · Bootstrap

- Full frontend with responsive UI and dynamic pagination with category filters.
- Lazy Loading for performance optimization; state managed with React Hooks.

**✓ Demo available · Repo on GitHub**
